

Integrate Consultmed with MediRecords

To integrate Consultmed with MediRecords, you will need your establishment's:

- **MediRecords API Key (FHIR)**
- **MediRecords API (Connect)**

These keys can be requested from the MediRecords Support Team:

- Email: support@medirecords.com
- Phone: 1300 103 903

The keys apply to the entire establishment and only have to be entered **once**.

Where do I begin?

This guide is divided into two sections to support you at different stages of your Consultmed journey.

- **Section 1A (Pg 1):** For **New users** setting up Consultmed for the first time
- **Section 1B (Pg 3):** For **Existing users** setting up MediRecords integration
- **Section 2 (Pg 4):** How to integrate Consultmed with MediRecords

Section 1A. As a New User

Create your Consultmed Account

- Visit www.consultmed.co, then click 'Create account'.
- Choose an account type that matches your role within your health or care team

The screenshot shows a web form titled "Welcome. Let's get you started." with the instruction "Please select your healthcare profession". The form is divided into two main sections: "Health and Care Providers" and "Healthcare Managers and Support Services".

Health and Care Providers

- General Practitioner
- Specialist
- Doctor-in-training
- Nurse or Midwife
- Dentist
- Allied health
- Other care provider

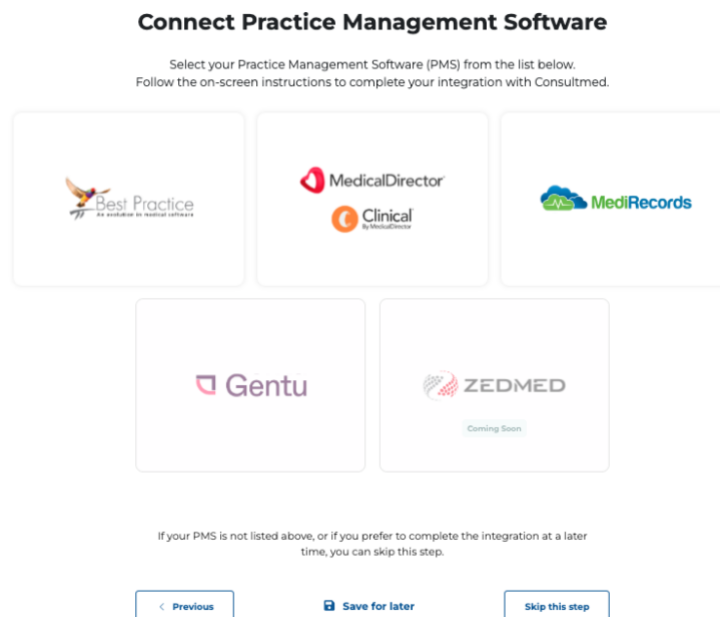

Healthcare Managers and Support Services

- Practice Owner or Manager
- Administrative and Clerical Support
- Health services or Operations manager

At the bottom of the form, there are two buttons: "Save & Exit" and "Next Step".

- Enter your professional details
- Search for your establishment by name or address, or add a new establishment by selecting + Add Practice
- Enter your registration details. You also have the option to add a signature or profile image to your account
- When prompted to *Connect Practice Management software*, select **'MediRecords'**

Now proceed to Section 2 (Page 4) if you would like to integrate MediRecords while setting up your new Consultmed account.

Tooltip: You can skip this step and complete the integration later after registration. To return to this step, please refer to Section 1B.

Once your integration is connected, please complete your registration.

- Carefully review and agree to Consultmed's Terms & Conditions
- Select **'Complete Registration'** to finalise your account setup
- Configure Multi-Factor Authentication (MFA) to ensure account privacy and security

Your Consultmed registration and MediRecords integration are now complete.

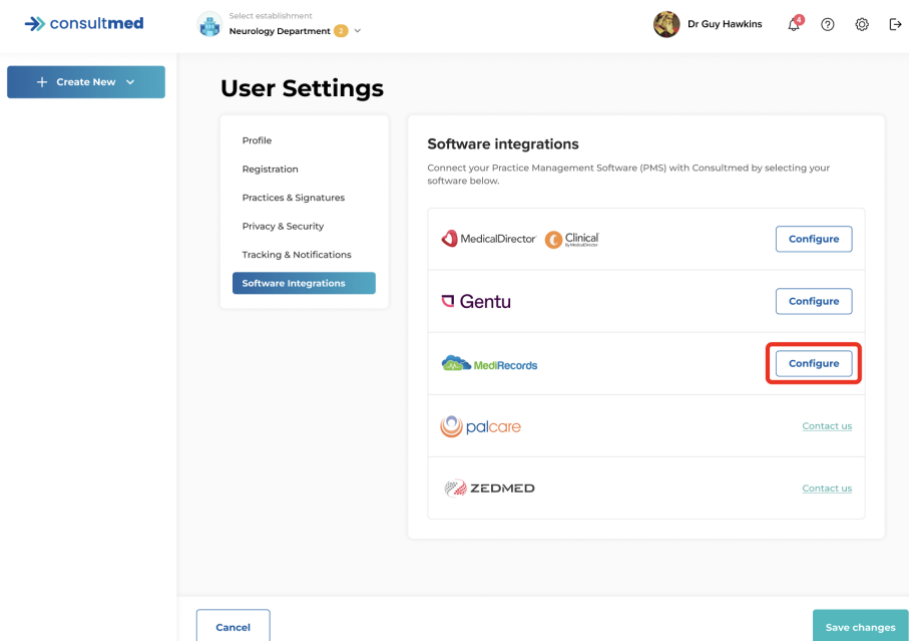

Section 1B. As an Existing Consultmed User

Tooltip: The Consultmed and MediRecords integration only needs to be set up once for your practice using your API keys.

Configure MediRecords from 'User Settings'

- Once you have signed in to your Consultmed account, go to **'User Settings'** by selecting the cog wheel icon in the top right corner of the screen.
- Then select **'Software Integrations'** and choose **'Configure'** on the MediRecords card.

To continue with the integration, please proceed to **Section 2** below.

Section 2. Integrate with MediRecords

Step One

Enter MediRecords API Keys

- Enter the following details:
 - **MediRecords API Key (FHIR)**
 - **MediRecords API Key (Connect)**

Quick Install Guide

Consultmed & MediRecords

- The API keys can be requested from the MediRecords Support Team. Contact the team via email (support@medirecords.com) or by phone (1300 103 903). The keys apply to the entire establishment and only have to be entered once.
- Enter the API keys in their respective fields and click **'Next Step'**.

consultmed HL7 FHIR MediRecords

Connect Consultmed with MediRecords PMS

We recommend integrating your practice management software (PMS) with Consultmed. This integration allows you to securely import patient health information directly into Consultmed. Sensitive information remains secure and authenticated, while saving you time from manual data entry.

Enter MediRecords API Key (FHIR)

Enter MediRecords API Key (Connect)

Next step

Please contact the MediRecords support team on 1300 103 903 or at support@medirecords.com to request your API keys or if you require technical support.

For instructions on how to connect Consultmed with MediRecords PMS, please refer to our [integration guide](#) or watch [this video](#).

Back

Save changes

Step Two

Select Practice and complete connection details

- Select your **MediRecords practice** from the dropdown
- Ensure this matches your **Consultmed establishment**

Connect Consultmed with MediRecords PMS

We recommend integrating your practice management software (PMS) with Consultmed. This integration allows you to securely import patient health information directly into Consultmed. Sensitive information remains secure and authenticated, while saving you time from manual data entry.

Select the Practice you'd like to connect with Consultmed. Once confirmed, the practice will be integrated with your Consultmed account.

Practice

Bankstown-Lidcombe Hospital

Please confirm your Name and Provider Number exactly as it appears in MediRecords PMS

First Name * Last Name *

Hawkins Guy

Provider Number *

123456

Connect

Please contact the MediRecords support team on 1300 103 903 or at support@medirecords.com to request your API keys or if you require technical support.

For instructions on how to connect Consultmed with MediRecords PMS, please refer to our [integration guide](#) or watch [this video](#).

Back

Save changes

- Confirm your **First Name, Last Name** and **Provider Number** exactly as they appear in MediRecords.
- Important:
 - Provider numbers are **mandatory** for GPs, NPs and non-GP specialists
 - Provider numbers are not required for Practice Managers
- Once complete, select '**Connect**'.

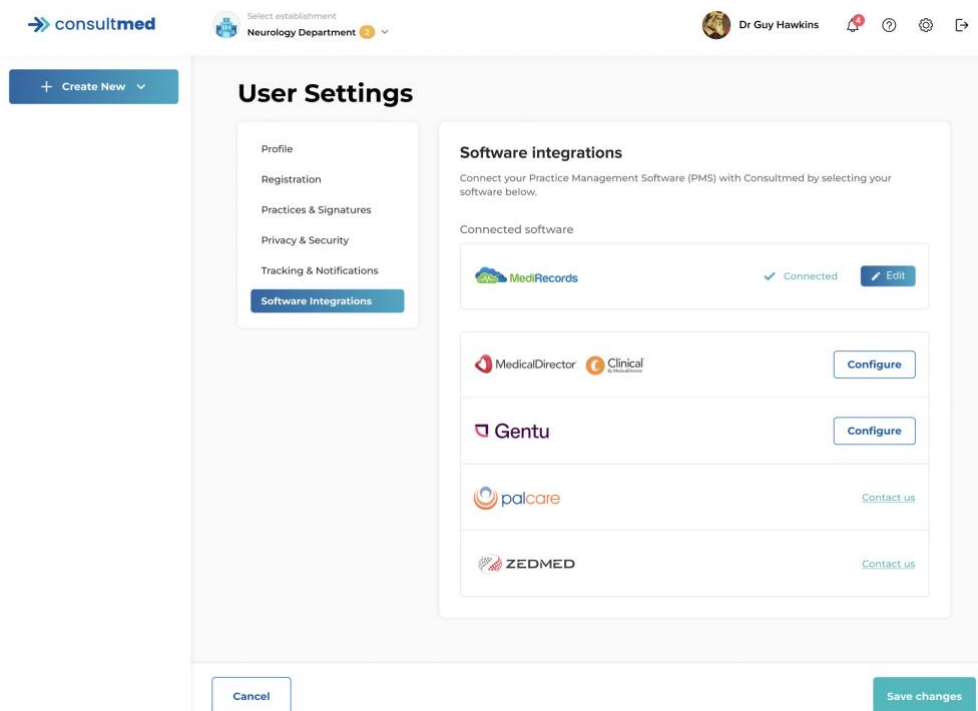

Tooltip: When you invite other users to your establishment, the API keys and Practice selection will already be completed for them and cannot be changed.

This means they can start using the MediRecords integration across your practice without needing to set it up again.

Successful connection

Once the integration is complete, a **Connected** status will appear. This confirms that the integration has been successfully set up for your establishment.
